Miggytrac™ B501

Small, battery-operated tractor

Miggytrac™ B501

Miggytrac B501 is a compact, battery-driven tractor that easily automates your GMAW process.

Ideal for use with ESAB's semi-automatic power sources and feed units, Miggytrac B501 features the latest in stepper motor technology for high efficiency. A standard ESAB welding torch can be quickly attached to the unit.

Miggytrac's true 4-wheel drive combined with highfriction wheels guarantees stable movement of the tractor. An optional "easy fit" magnet kit allows for the handling of bent or angled workpieces. The carriage follows the joint using guide wheels, which can be adjusted to allow the unit to drive itself against the workpiece.

- Battery 18V (not included in delivery)
- Operating time 8 h
- Stepper motor technology
- Horizontal tensile force without magnet 12 kg
- Horizontal tensile force with magnet 25 kg
- Maximum angle 45°
- Vertical tensile force at 45° with magnet 11 kg

| Specifications / Technical Data | |
|---|---------------|
| Battery voltage, VDC (battery not included) | 18 |
| Operating time, h | 8 |
| Weight, kg | 12 |
| Motor type | Stepper motor |
| Travel speed, mm/min | 100-1300 |
| Slide adjustment, horizontal, mm | ± 32 |
| Slide adjustment, vertical, mm | ± 40 |
| High friction rubber wheel, 4-wheel drive, mm | 75x20 |
| Horizontal tensile force without magnet, kg | 12 |
| Horizontal tensile force with magnet, kg | 25 |
| Max angle, degree | 45 |
| Vertical tensile force at 45° with magnet, kg | 11 |
| Dimensions (LxWxH), mm | 310x290x250 |
| Weight, kg | 12 |
